

# NETConnect

## Connecting European Culture through New Technology

NETConnect is a project promoted by Culture 2000 European Programme. NETConnect concerns the definition of cultural interconnections among three archaeological sites (in Italy, Germany, and Poland) and foresees the digital

reconstruction of the sites, the diffusion of multimedia contents and the use of GIS technology for providing geographical information about the scenarios. The duration of the project is of 36 months (from 2006 to 2009).

The main objectives of the project are the following:

- the sharing and highlighting of common Cultural Heritage of European significance,
- the use of state-of-the-art technology to make European heritage more visible and accessible,
- the improvement of access and participation in culture and in new technologies for all citizens of the EU,
- cooperation activities between cultural operators and technological experts for spreading European culture through the newly established International network.
